Visit 3 - Folders

Look at as many documents in the folder as you can, and determine the following:

1. Talk about as many documents as you can. How do the documents connect to your assigned document?

2. Are there specific documents that reveal new information, or information that is helpful for understanding your document?

3. What questions can you NOT answer based on the information available to you?

Take lots of pictures. The more documents you have accessible to you, the easier it will be to write your paper. Be prepared to discuss your reactions to your folder and the broader story the documents and folders illuminate in wrap up.
